

Our Services

Genomic & Transcriptomic Analysis:

WES/WGS, RNA-seq, and single base accuracy of variant calling for comprehensive genomic profiling.

Variant Interpretation:

ClinVar/ACMG classification, pathogenicity analysis, and AMP/CAP - NCCN (clinical actionability)

Clinical Reporting:

Clear, actionable diagnostic reports
Therapeutic targets, NCCN guidelines for therapy and FDA drug.

AI-Driven Biological Insights:

Multi-omics integration, predictive modeling, and specialized oncology pipelines.

Custom Bioinformatics Pipelines:

Automated NGS analysis,
cloud/local deployment,
& Quantum-enhanced Simulations.

ACCELERATING CLINICAL GENOMICS WITH PRECISION BIOINFORMATICS

BIO-SILICON LABS

Delivering high-resolution, clinically actionable insights powered by AI and custom-built pipelines

- SNP & InDel Detection
- Early Disease Risk Assessment
- Carrier Screening & Pharmacogenomics
- Somatic & Germline Variant Interpretation
- Liquid Biopsy & cfDNA Analysis
- Population-Scale Screening

**FREE PILOT ANALYSIS FOR
YOUR FIRST 5 CLINICAL SAMPLES**

BIO-SILICON LABS

Scientific

Intelligence

for Precision Medicine

WHERE BIOLOGY MEETS SILICON

INNOVATIONS

*Precision Bioinformatics.
Real Clinical Impact.*

Stammersdorfer Strasse 85, 1210, Vienna,
Austria, EU Tel: +43 676 7936361 /
Shahganj U.P 223222, India Tel: +918802273055
Web: www.biosiliconlabs.com

Bio-Silicon Valley

Pricing & Net-Work

WES Analysis	€1800 – €3600
Variant Interpretation (+TMB/MSI status)	€3500 – €5000
Clinical Report	€5000 – €15000
Complete Package	€26,000 – €30,000

Report Generation

Delivers clinician-ready reports within 7–10 days, including:

- Genomic Profile: Variants, TMB & biomarker status
- Therapy Insights: FDA-linked therapies & clinical trials
- Clinical Summary: Variant interpretation & risk indicators

WHO WE WORK WITH

- **Hospitals** (Oncology, IVF, Rare Diseases)
- Clinical **Diagnostic Labs**
- **Biotech & Pharma R&D** Teams
- **Academic Research Institutions**

BIO-SILICON LABS

Transforming bioinformatics & biotech into real-world diagnostics & therapeutics

COMPANY OVERVIEW

WHERE BIOLOGY MEETS SILICON INNOVATIONS. FOCUSING ON THE FUSION OF BIOTECHNOLOGY, SILICON TECHNOLOGY, AI, NGS, AND MORE

WHY PEOPLE TRUST US!

- ✓ Deployed in clinical and translational research environments
- ✓ Validated AI models for cancer image classification and segmentation
- ✓ End-to-end pipelines from NGS preprocessing to reporting
- ✓ Compliant with HIPAA, GDPR, and global health data standards

"From Device dev. to Data to Diagnosis." - **Bio-Silicon Labs**
